# WHAT HIGH SCHOOL STAKEHOLDERS ARE SAYING ABOUT EDREADY MONTANA

"Hearing and seeing someone else explain a concept in a different way can be very helpful. I am the only math teacher here at the high school and it's very helpful to have them exposed to a different voice." - Teacher Sharon Carroll, Carter County High School, Ekalaka, MT

"...it's very straightforward...we found it to be so much more useful than other programs we looked at and the students find it user friendly."  
- Principal Kevin Meredith, Plains High School, Plains, MT

"I say to my students, you know Washington-Grizzly Stadium? They say, 'Yeah.' Well, that's the family who brought EdReady to you! and they say, 'Oh, that's awesome!' and we are all just so phenomenally grateful."  
- Teacher Denise Harvey, Custer County High School, Miles City MT

"As a class, we use EdReady a lot, at least fifteen minutes every couple of days. The part about it that I like is the tests because EdReady shows where I've improved, and it also shows what I need to work on."  
-Student Carter County High School, Ekalaka MT

"I am using the math program currently. This program helps me understand new concepts and ideas. I feel like students are able to learn more using this program."  
- Student, Colstrip High School, Colstrip, MT
